

Executive Summary

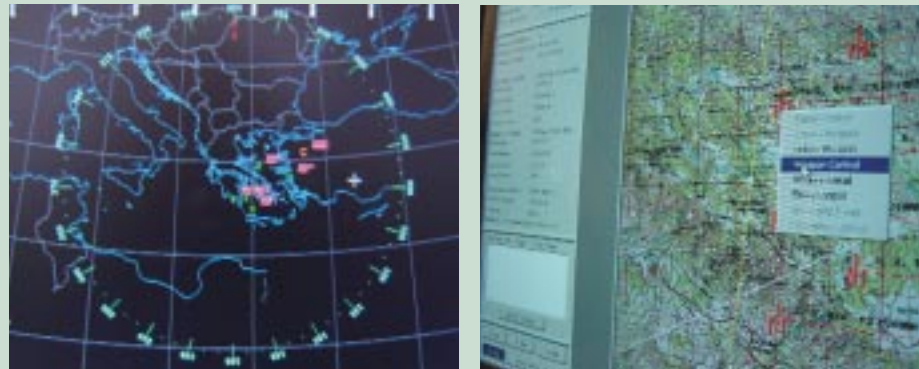

Interoperability Systems International Hellas S.A.

The World of Interoperability

Interoperability Systems International Hellas S.A. (ISI Hellas) was established in Greece in 1991 with the goal of providing high quality integrated systems for the domestic and international defense markets. The company is engaged in the design, development, integration, installation, testing and follow on support of both Software and Hardware for:

- > Real-time Tactical C³I Systems
- > NATO Standard Data Links
- > National Data Links
- > Interoperability Systems
- > Embedded Tactical Systems Trainers
- > Tactical Systems Simulators
- > MIS for Defense Applications
- > Military Message Handling Systems

The Company's employees are highly educated with 65% of the engineers possessing post graduate degrees.

ISI Hellas' staff and facilities are certified to handle classified material and documentation up to National (Hellenic) and NATO secret levels.

All **ISI Hellas'** development efforts occur under formal Quality Assurance procedures that have been certified to meet the requirements of ISO 9001: 2000.

The Company's motto "Quality First" is foremost in all of its practices and procedures thus ensuring delivery of quality products in a cost effective manner.

Capabilities

- > Land, Air and Naval Military Applications
- > COTS Components
- > DOD MIL STD 498 Process using ADA and C/C++
- > Experienced and Professional Engineers
- > Operational and Technical Knowledge
- > Recognized Greek Defense Industry
- > Eligible Party for Offset Programs
- > Co-operative Development with other Companies
- > Delivered Systems in Operational Use

ISI Hellas' Products

- > Customized interoperable system solutions
- > Adaptable off-the-shelf software applications
- > NATO standard data links including Link 1, Link 11/11B, ATDL-1, Link 16, IJMS, etc.
- > Non NATO and Country specific data links
- > Command & Control Systems for Maritime Patrol Aircraft
- > Data Link Simulators and Trainers
- > Radar Video Simulator
- > Embedded Naval Trainers for Combat Centers (Battle Tactical Trainers) with optional DIS (Distributed Interactive Simulation) Interface
- > Land-based Simulation and Training Systems for Maritime Patrol Aircraft and Airborne Early Warning & Control Aircraft with optional DIS Interface
- > Classroom based Trainer/Simulator for the Firefinder TPQ-36/37 radar
- > NTDS Interface Industry Packs
- > A Universal Test and Training System

Present and Future

- > Established in the International Defense Market
- > Reputation for Originality in Development
- > One of the few Global "High Tech" Firms in Greece
- > Continued Expansion on a Global Level
- > Increasing Technology Base by keeping up with the latest innovations in the industry
- > Advances in Communications Technology
- > Requirements of Network-Centric Warfare
- > Committed to Meet the Challenge
